

LiftMotive

Extension Ramps for Scissor Lifts

Ideal for racing cars, super sports cars and tuning- / show vehicles. With this set of ramps, the drive on height is reduced from **110 mm, to approx. 50 mm.**

Easy removal, It is possible to take away the extension ramps for scissor lifts within a few seconds, they do not have to be fixed on to the lift.

- Ideal for very low profile or low clearance vehicles
- Lowers the angle to make it easier for those really low sport cars.
- Solid core – no holes or hollows for your favorite spider to live in!
- Unscotable! Won't slip or slide, no matter the surface
