Monday - Friday, 8AM to 4:30PM

LiftMotive LM-2800MR-P Mid Rise Portable Scissor lift.

It is the perfect lift for commercial quick service bays and tire service specialists that need extra lifting height. It easily lifts a 2.800kg car or truck to a comfortable working height without requiring the user to position arms under the lifting points of the vehicle.

Features

Automatic Engaging Safety Locks

The lift is equipped with two high quality automatic engaging safety locks. The manual release wipes out the need for a pneumatic air supply.

208-240V AC Mobile Power Unit

The durable hydraulic power-unit works on a 208-240V power-supply. This means it's the perfect setup for your home garage!

Lockable Ramps

Ramps are lockable at full extension. This means the maximum lift point spread is adjustable for short and long wheelbased cars.

P for Portable

P stands for portable. A wheel kit and transport bar is included in the kit, this makes the lift portable to use it anywhere you want!

2800KG Capacity

With a lifting capacity of 2800KG the LiftMotive LM-2800MR-P is the best solution for your garage

Set of 8 Steel Lift Pads

Four low and four high pads are included
